

SOUTH CAROLINA Child Passenger Safety

FIRE SAFE
South Carolina
A COMMUNITY RISK REDUCTION PROGRAM

When choosing a car seat, consider the child's age, weight, height, and development levels. Always follow the manufacturer's instructions.

Be sure your child's passenger safety seat is correctly installed.
Email FireSafeSC@lrr.sc.gov to schedule an installation.

CAR SEAT**

Rear seat on the passenger side of the vehicle.

4 years old and up*
BOOSTER SEAT

Lap and shoulder belt must be used. The rear seat of the passenger side of vehicle.

**8 years old
OR
at least 57" tall
SEAT BELT**

Restrained with an adult seat belt. Buckle children in back seat until they are 13.

**or until child exceeds height or weight limit allowed by manufacturer*

Installation Tips:

A properly installed car seat will not move more than an inch. To test it, shake the car seat at the base, where secured.

Make sure the harness is tightly buckled. With the chest clip placed at armpit level, pinch the strap at the child's shoulder. If you are unable to pinch any excess webbing, the harness is correctly tightened.
